

Administration, Board of Governors and Staff
congratulate our
Chief of Maternal-Fetal Medicine
and
Acting Co-Chair of the Department of Gynecology and Obstetrics

Patricia A. Devine, MD

on her selection

by

New York Magazine

as a

2009 Best Doctor

in the specialty of

Maternal-Fetal Medicine

Dr. Devine joined Sound Shore Medical Center in 1993 to develop and launch the Antepartum Testing Laboratory which was the first institution-based facility in Westchester to achieve accreditation by The American Institute of Ultrasound in Medicine. She also nurtured its elevation to a Center of Excellence for First Trimester Screening. Annually Dr. Devine assesses and treats more than 1400 women experiencing high-risk pregnancies, including those patients with high blood pressure, diabetes, kidney or gastrointestinal disease. She was selected as a national Local Legend, which recognizes women physicians for their demonstrated commitment, originality, innovation or creativity in the field of medicine. She is a past recipient of New Rochelle Chamber of Commerce Women of the Year, featured in *MD News* magazine and chosen one of only 164 doctors for inclusion in *Westchester Magazine's* 2007 Best Docs issue.

Dr. Devine's is a caring, compassionate physician whose expertise safeguards lives and whose selection as a *New York Magazine* Best Doctor is well deserved.
